1. It is made of paid-up capital, audited retained earnings/losses, statutory reserve plus any subordinated loans, if any, and other items specified in the Prudential Rules
2. Represents CMI's total exposures to credit, market and operational risks. Thus, minimum capital requirements increase with larger CMI's exposure to these risks. And starting from the first quarter of 2023 and based on the amended prudential rules, the minimum limit is calculated based on the risk-weighted assets
3. It is a multiple that shows the number of times capital base coverage to the minimum requirement. And starting from the first quarter of 2023 and based on the updated capital adequacy rules, the capital adequacy ratio is displayed as a percentage instead of the previously calculated multiple.

1. Includes robo-advisory portfolios managed by capital market institutions licensed for managing investments (MI).
2. The decrease in funds investment in DPMs in the second quarter of 2023 is due to the update of the Prudential Rules and the reporting model accordingly, which resulted in the reclassification of DPMs assets in money market instruments in the other assets column.
3. Starting from Q1 2024, only DPMs with securities will be reported.
